Image data received
401
402
Select block; perform sample-rate conversion
400
403
Enhance data using each candidate vector
404
Compute error function with spatio-temporal bias for each candidate vector
405
Select output of candidate vector with smallest error function
406
All blocks within current field processed?
no
yes
407
Select next block in current field
408
Select next field
